## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1755

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

The disclosure is objected to because of the following informalities: All occurrences of "alkali earth" should be "alkaline earth". Appropriate correction is required.

Claims 1, 2 and 8 are objected to because of the following informalities: All occurrences of "alkali earth" should be "alkaline earth". Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Gwak et al.

This reference teaches a low voltage red phosphor comprising a  $\text{MTiO}_3$  matrix and the doping agents  $\text{M}'$ , Zn and  $\text{M}''$ , where M is Mg, Ba, Sr or Ca,  $\text{M}'$  is Al, Ga, In or Tl and  $\text{M}''$  is Pr, Eu, Tb, Er, Ce or Tm. The amount of Zn is 0.01-15 mol%, the amount of  $\text{M}''$  is 0.05-5 mol% and the amount of  $\text{M}'$  is 0.5-80 mol%. These amounts fall within or are the claimed ranges. The reference teaches the claimed phosphor.

Art Unit: 1755

Claim 8 would be allowable if rewritten or amended to overcome the objection set forth in this Office action.

Claim 9 is objected to as being dependent upon an objected base claim and will be allowable once the objection in claim 8 is corrected.

The claimed process is not taught or suggested by the cited art of record. Gwak et al teaches forming the phosphor by firing a mixture of a zinc compound and  $\text{MTiO}_3\text{:M}', \text{M}'$ , where M, M' and M'' has the above definitions. There is no suggestion in the art that  $\text{MTiO}_3\text{:M}', \text{M}'$  can be prepared in situ during the step of firing with the zinc compound.
